

Final Project Introduction

Name: student grade searching system

User Group contains Student and Teacher

In this website, users can log in as students or teachers. Students can update their personal information like email, first name, last name, etc. Also, they can check their courses grades and register (add) courses using the plus icon in the right upper corner.

Teachers can update their own information as well, in the meantime, add their courses and check the list of students that registered for this course, and update their scores.

Users need to manually type their roles in the register page. Also, the names of the corresponding courses in students and teachers must be the same.
